## ESNEK BARİYER ÜRETİCİSİ

Raysan olarak ana temamız iş sağlığı ve işçi güvenliğinin sağlanması, ve bununla birlikte global anlamda sanayinin gelişen ve değişen gereksinimlerine en hızlı ve en uygun ürünler ortaya koyarak, binaların, araçların, makina ve ekipmanların, altyapıların ve en önemlisi de insanların korunmasıdır.

Raysan, endüstriyel yapılar, lojistik depolar, üretim tesisleri, kimyasal üretim ve depolama tesisleri, hava alanları gibi en zorlu çalışma ortamları için esnek, dayanıklı ve yüksek verimli güvenlik bariyerlerinin üretimini yapan Türkiye'nin ilk ve tek yerli firmasıdır. Çelik bariyerler yerine yüksek teknolojili plastik hammaddeleri çeşitli test ve analizler yardımıyla geliştirerek yüksek kaliteli ve yenilikçi ürünler tasarlar, geliştirir ve üretir.

Raysan olarak, üretici olmanın verdiği avantaj ile müşterilerinin beklentilerini ve spesifik ihtiyaçlarını en hızlı şekilde karşılayacak çözümler sunmayı taahhüt ederiz. Müşteri memnuniyeti ve sürekli kendini geliştirme tutkusuyla değer zincirimizi oluşturmaktayız.

## FLEXIBLE BARRIER MANUFACTURER

As Raysan, our main theme is to ensure occupational health and safety, and in addition to this, the protection of buildings, vehicles, machinery and equipments, infrastructures and most importantly people by creating the fastest and most suitable products for the developing and changing needs of the industry globally.

Raysan is the first and sole domestic producer of flexible, durable and engaged highly efficient security barrier for industrial buildings, logistics warehouses, manufacturing plants, chemical production and storage facilities and other though working environments such as airports. Raysan designs, develops and produces high-quality and innovative products by developing high-tech plastic raw materials instead of steel barriers, with the help of various tests and analyzes.

Raysan, with the advantage of being a manufacturer, is committed to provide solutions that meet the expectations and specific needs of its customers in the fastest way. We form our value chain on customer satisfaction and with the passion for continuous self-improvement.

## SÜRDÜRÜLEBİLİRLİK

Üretim aşamalarımızın tamamında doğanın kaynaklarını etkin ve basiretli bir şekilde kullanarak doğaya duyarlı hareket etmekteyiz.

Sürdürülebilirlik yaklaşımı içinde kalıcı değerler üretebilmek amacıyla ürünlerimizin tamamını geri dönüştürülebilen ürünleri tercih ederek oluşturmaktayız.

Doğayı önemsiyor ve yarınlarımıza saygılı oluyoruz.

## SUSTAINABILITY

We act in a sensitive manner to nature in all of our production stages by using the resources of nature effectively and prudently.

In order to maintain long-term values within the sustainability approach, we create all of our products by using recyclables.

We care about nature and respect our future.

Raysan Esnek Bariyer sisteminin kendine özgü esnek ve darbe sönümleyen yapısı sürekli aynı performansı sergileyebilmesi için çeşitli test ve analizlere tabi tutulur. Bu test ve analizler ile Raysan tasarımcılarının becerileri birleşerek ihtiyaca uygun ürünler geliştirilir. Ürünlerimiz geleneksel sistemlere kıyasla esnek olduğu için enerji sönümlemesi maksimum seviyede iken özel tasarımı sayesinde gerilme dayanımı optimum seviyede kalır.

The flexible and shock-absorbing structure of the Raysan Flexible Barrier system is subjected to various tests and analyzes to ensure the same performance continuously. With these tests and analysis, the skills of Raysan designers are combined and products suitable for the needs are developed. Since our products are flexible compared to conventional systems, while energy absorption is at the maximum level, tensile strength remains at optimum level thanks to its special design.
